## **Project Name:** Formation Control of Multiple Swarm Robots **Objectives:**

- 1 Implement formation control over a group of Spark V robot using overhead camera and aruco markers for localization of the robot
- 2 Implement swarm behaviors like disperse, follow the leader etc

## **Deliverables:**

- Robots capable of making any desired formation
- Robots capable of implementing Swarm behaviors

No.	Task	Deadline
1.	Python,Spark V ,OpenCV introduction interface Xbee	2days
1.	Position and orientation calculation of multiple Spark V robots	3 Days
2.	Go-to-goal for a single Spark V	4 Days
3.	Formation testing for 2-3 robots	2 Days
4.	Algorithm for formation control of multiple robots	3 Days
5.	Avoid obstacle controller	3 Days
6.	Algorithm testing and fine tuning. Scaling up the number of robots	3 Days
7.	Local Swarm behaviors	8 Days

## Task Completed

- Cropping and transforming the Arena area under black border.
- The position and orientation  $(x, y, \Phi)$  of Multiple robots can be found using aruco markers placed on the robot

Opencv-Contrib-python (aruco library)

[https://github.com/opencv/opencv\\_contrib](https://github.com/opencv/opencv_contrib)

Future Plans

Thank You

- Suitable Equation for the differential drive robot.

- $(x, y, \theta)$  of each robot is transmitted via XBee to the robot. The desired location  $(x_g, y_g, \phi)$  is also transmitted. The XBees are configured in a star configuration.

Future Plans

Thank You

- Communication between computer(Master) and robot(Slave) to transmit the robots initial state and desired state  $(x, y, \Phi)$ (Serial Communication Protocol)
- Developing a effective differential drive robot model for the Spark V
- Conversion from unicycle model to differential drive model
- Implementing Go-to-goal controller using P controller algorithm on the Spark V

Future Plans

Thank You

- Communication Of Master(PC) to Multiple Slaves(Spark V).
- Multiple robots capable of moving to a point selected manually.
- Multiple robots making pre defined formation
- Swarm behaviors like "follow the leader"
